

Day 10

Things to Watch

We've been having a lot of mathy warm-ups lately, so here's one that's not! Turn to someone sitting next to you and take 2 minutes to discuss:

What have you been watching lately, if anything? Would you recommend it?

Examples of Subgroups (continued)

1. "Suppose G is a group and H is a subgroup of G . Then $Z(H)$ is a subgroup of $Z(G)$."

This statement is...

(A) True.

(B) False.

Cyclic groups
